

Czech on-snow Workshop

Theme: Introduction of the Czech Technical and Teaching Concept.

“Use of critical thinking and the theory of tacit knowledge in teaching skiing.”

The aim of Czech on-snow workshop is to present the essentials of the Czech educational system, which consists of interdependent technical and teaching concepts and is developed through all levels of Czech snowsports instructors' education. The key elements of our system will be presented together from different perspectives considering theory, methods, tactics and progressions based on student-centered approach to teaching snowsports during our on-snow workshop. The main purpose of the Czech workshop is then to emphasize the need for critical thinking skills while teaching skiing and snowsports in general.
