

Czech Small Lecture

Theme: Introduction of the Czech Educational System.

“The bridge between alpine nations and non-alpine nations from all around the world”

The aim of the Czech on-snow workshop was to present the Czech technical and teaching approach. In the small lecture we would like to shift focus more towards Czech qualification system for snowsport instructors and present its key elements. The key role in this system is played by unique evaluation and assessment system which includes all levels of snowsports instructors from entry-level to examiner level on one consistent scale. This helps us to emphasize the connection between student-centered content of our courses and the way how the courses are conducted using candidate-centered approach by our examiners.
